

Negrean, G. & Denchev, C.M. 2004. Addition to the Erysiphales of Bulgaria. *Mycologia Balcanica*. – *Mycologia Balcanica* 1: 63-66.

Abstract. Of the 73 specimens of Erysiphales collected in the north-eastern part of Bulgaria in 1996, 1998, and 1999, and another 3 Bulgarian specimens present in herb. BUCM, one species (*Erysiphe caulicola* (Petr.) U. Braun), and 42 fungus-host combinations are reported for the first time from this country. In addition, 17 new localities for previously known such combinations are recorded from Black Sea Coast, Northeast Bulgaria, and Sofia region.

Key words: ascomycetes, Bulgaria, Erysiphales, fungal diversity
