

Stoykov, D.Y. 2005. New records of Diaporthales in Bulgaria. I. – *Mycologia Balcanica* **2**: 69-74.

Abstract. One genus (*Ditopellina*) and three species (*Ditopellina saccardiana*, *Gnomonia nantensis*, and *G. rosae*) of Diaporthales are reported as new to Bulgaria. Nine species (*Apiognomonium errabunda*, *Apioplagiostoma carpinicolum*, *Apioporthella vepri*, *Ditopellina saccardiana*, *Gnomonia comari*, *G. nervisequa*, *G. rosae*, *Hypospilina pustula*, and *Plagiostoma arnastadiense*) are established on new substrata, and 21 species are recorded from new Bulgarian localities.

Key words: ascomycetes, Bulgaria, Diaporthales, fungal diversity
