

Zhurbenko, M.P. 2007. The lichenicolous fungi of Russia: geographical overview and a first checklist. – *Mycologia Balcanica* 4: 105-124.

Abstract. A first checklist of the lichenicolous fungi of Russia is presented, based on all pertinent publications (134 sources) and some unpublished herbarium specimens. The list enumerates 276 species in 97 genera from 285 lichen host species in 102 genera. The knowledge of lichenicolous fungi in various regions of Russia is outlined.

Key words: *Ascomycota*, *Basidiomycota*, bibliography, fungal diversity, lichen parasites
