

Voytyuk, S. O., Heluta, V. P. & Nevo, E. 2004. *Neoerysiphe galii*, a new powdery mildew fungus in Israel – Mycologia Balcanica 1: 135-137.

Abstract. Information about *Neoerysiphe galii* (Erysiphales), a powdery mildew fungus new for Israel, is provided. The necessity of additional examination of *Neoerysiphe* and *Golovinomyces* specimens collected on *Galium* species is emphasised since some of these host species can be infected, apart from *N. galii* and *G. riedlianus*, by another fungus similar to *G. cichoraceorum*.

Key words: Erysiphales, Israel, *Neoerysiphe galii*, powdery mildew fungi
